## OBJECTIVE STATEMENT

---

- 1+ years of experience in full stack development, microservices, database management, and cloud architecture
- Expertise in Java, Spring Boot, React, JavaScript and experienced in unit testing, and building secure software

## EDUCATION

---

### Stony Brook University

Stony Brook, New York

B.S. in Information Systems and Applied Mathematics & Statistics

Graduated December 2021

- o **Concentrations:** Financial Information Systems Specialization
- o **Related Coursework:** Data Structures and Algorithms, Database Design and Practice, Data Analysis, Computer Networks, Analysis of Algorithms, Information Systems in Management, Statistical Laboratory

## EXPERIENCE

---

### Software Engineer

January 2023 – April 2024

#### Cognizant

Remote

- Facilitated the migration of 4 medium sized application databases from MongoDB on premise to MongoDB Atlas
- Improved UI layout and formatting of an internal application for 100+ employees using HTML, CSS, and JavaScript
- Analyzed and upgraded an ExtJs application for 50+ employees using JavaScript, ensuring all components functioned correctly through smoke and end-to-end testing
- Led cross-functional team discussions with QA, DevOps, and project manager to allocate 120+ story points for QA, DevOps, and development tasks, and reviewed functional and non-functional requirements for the project

## PROJECTS

---

### [MERNEats Food Ordering Site](#)

Remote

Solo Project

June 2024

- Developed a full-featured food ordering application using the MERN stack with features such as order status, restaurant info, stripe payment, search functionality, and an admin only dashboard for managing restaurants
- Integrated order delivery status updates for customers and enabled restaurant owners to update the status of orders, allowing customers to track their orders in real time

### [ProTech eCommerce Site](#)

Remote

Solo Project

February 2024

- Developed a full-featured shopping cart application using the MERN stack and utilized Redux Toolkit for efficient state management, improving scalability and maintainability of the application
- Implemented essential features such as product reviews and ratings, PayPal and credit card payment features, search functionality, and an admin only dashboard for managing products, users, and orders efficiently

## CERTIFICATIONS

---

Microsoft Certified: Azure AI Fundamentals

February 2024

Udemy Agile Project Management: Requirements, Planning, and Tracking

May 2023

AWS Certified Cloud Practitioner

December 2022

## ACTIVITIES

---

### CodePath

Remote

Software Engineering Tech Fellow

June 2023 – August 2023

- Led a focused group of 6 participants, ensuring personalized attention and fostering collaborative learning environments during the sessions
- Collaborated with fellow mentors and instructors to address broader program goals and enhance the overall learning experience

## SKILLS

---

**Programming:** SQL | Java | Python | JavaScript | TypeScript | HTML5 | CSS | Node.js | React.js | Express.js | Spring Boot | R  
**Tools:** Git | MySQL | Visual Studio Code | XCode | Rally | IntelliJ | PyCharm | Eclipse | Agile | AWS | Azure | Subversion | Spring Boot | Postman | MongoDB Atlas | Fiddler | Jenkins | Microsoft Office Suite
